

# CNC Auto-Motion MotionCub Cupping Machine

# **Machine Specifications:**

## **Power/Air Requirements:**

Electrical: Standard Grounded 110/120 VAC, 10 amps  
Pneumatic: +120 PSI (recommended) 5/16 Quick Connect  
Dust Collection: Standard 4" Flexible Duct

Tools Required: ½ inch Jacobs Chuck key (included)

## **Features:**

- Solid steel frame base
- Thomson precision linear guide rails
- Used standard tooling (Jacobs chuck)
- Foot pedal pneumatic activation to lock bat in place
- Self centering design allows proper alignment of bat
- Easily adjustable to accommodate bat lengths from 21 inches to 42 inches
- Automatic cup depth adjustment for repeatable cup depths
- Manual cup depth control via use of Start/Stop button for gradual control
- One touch operation via convenient Start/Stop buttons
- Dust extraction hood (dust collector/piping not included)

## **Machine Footprint Size:**

15 inches (W) x 57 inches (L) x 44 inches (H)
